**Sent:** Thursday, March 07, 2013 4:42 PM  
**Required:** WALTZ David; Henning, Alan; BRANNAN Kevin; Powers, David; FOSTER Eugene P; Rueda, Helen; Carlin, Jayne; Wu, Jennifer; Jesse Conover (conover@pdx.edu); LOBOY Zach; MICHIE Ryan; Peter Harkema; Leinenbach, Peter; SEEDS Joshua; TARNOW Karen E; Turner Odell  
**Subject:** MidCoast LSAC-TWG Prep  
**When:** Tuesday, March 12, 2013 2:00 PM-5:00 PM.  
**Where:** HQ-6A

Meeting room availability is choppy for next Tuesday, so I went with the most straightforward option. Currently, we have:

**HQ-6A: 2:00-5:00 pm**

I propose we focus on the first several agenda items for the March 20 Sediment TWG:

1. Management update (litigation, CZARA, etc) – Greg and Gene
2. modified Sediment TMDL Approach – discuss process changes and timeline
3. discuss the Source Assessment/Linkage Analysis approach from literature review to local site data, and
4. discuss response to landowners' request for delay

Ryan presented the shallow Landslides approach to ODF, and will do so again with industry members on 3/11. The presentation probably doesn't need a dry run as much as discussion of the role in Source assessment-linkage analysis and anticipated questions .

Call in MidCoast line:

**Conference line #** Nonresponsive

**Participant code:** Nonresponsive

I will schedule a follow-up for Thursday AM

Thanks, David
